

The 4th Asian Congress of Radiation Research (4th ACRR 2017)

The 4th Asian Congress on Radiation Research took place in Astana city, Kazakhstan under International EXPO – 2017 Exhibition during August 16 - 18, 2017. The Congress was attended by researchers from Kazakhstan, Japan, Russia, France, South Korea, China, Austria, Iran, India as well as by representatives of IAEA, the Ministry of Healthcare of the Republic of Kazakhstan, Ministry of Energy of the Republic of Kazakhstan.

Among others, Dr Amit Kumar (Convener of 5th ACRR) from India received prestigious AARR Award in Young Scientist category and Prof K. P. Mishra from India was honoured with the AARR Award in Medicine/ Biology in the Senior Scientist category.

The most important achievements and tendencies in peaceful use of atom power, results of fundamental studies and new results in the field of radiobiology, radioecology and radiation safety were discussed at the Plenary and various Sessions of the Congress. Problems of assessing radiation impact on environmental sites, effects of "low doses" of ionizing radiation, issues of changes in molecular genetics and their role in development of long-term exposure effects were also addressed.

Active discussions were also held on epidemiological findings, reconstruction of individual doses received from internal and external exposure and organization of electronic databases for evaluating the radiation risk to humans.
